

Dear Hiring Team,

I am writing to apply for the Software Engineering opportunity at Capgemini. As a Computer Science graduate, I have developed a strong foundation in Python, C++, SQL, data structures, algorithms, object-oriented programming, and software development through projects, internships, and hands-on learning.

Through my projects, I have built backend services, worked with APIs and databases, developed modular software systems, and used automated testing and CI/CD workflows. Building these projects has taught me the importance of writing reliable code, breaking complex problems into smaller tasks, testing my work, and continuously improving based on feedback.

I am looking for an opportunity where I can strengthen my software engineering skills, learn from experienced engineers, and contribute to real projects as part of a collaborative team. I believe my curiosity, problem-solving approach, and willingness to learn would allow me to contribute positively at Capgemini.

Thank you for considering my application. I would appreciate the opportunity to discuss my suitability for the role.

Sincerely,

Om Rajput
