SUMMARY

Computer Science graduate specializing in applied AI systems — agentic workflows, LLM orchestration (LangChain, LangGraph), and retrieval-augmented generation. Experienced in designing and shipping AI-powered tools, with a growing focus on system reliability, evaluation, and production-oriented engineering.

TECHNICAL SKILLS

- **Programming Languages:** Python, C++, SQL
- **AI / Agentic Systems:** LangChain, LangGraph, MCP Servers, RAG, Prompt Engineering, AI Agents
- **Backend & Tooling:** FastAPI, Pydantic, asyncio, Ollama, HuggingFace
- **Databases & Vector Stores:** FAISS, ChromaDB, MySQL, SQLite
- **DevOps:** Docker, GitHub Actions, AWS
- **Core CS:** Data Structures & Algorithms, OOP, Operating Systems, DBMS

PROJECTS

AgentForge | Python, LangChain, Pydantic, asyncio, MCP Servers Apr 2026 | [PyPI](#) · [GitHub](#)

- Developed and published an open-source multi-agent orchestration framework to PyPI — a system enabling 3 AI agents to execute GitHub, Notion, and Slack operations via custom MCP servers.
- Implemented fault-tolerant infrastructure including circuit breaker logic and retry handling; validated with **79 automated tests** via GitHub Actions CI/CD.
- Designed the system for modular agent coordination, prioritizing reliability over ad-hoc scripting approaches.

Multi-Agent Research Assistant | LangGraph, FastAPI, Docker Feb 2026 | [Live](#)

- Designed and engineered a multi-agent research system using LangGraph, with intent classification and confidence-based evaluation.
- Reduced search latency by **~4x** by parallelizing 4 search APIs via `asyncio.gather`.
- Cut API costs by **~90%** by batching Filter Agent evaluations into a single prompt, with no accuracy loss.

Chat SQL | LangChain, MySQL, LLMs Jan 2026 | [GitHub](#)

- Created a natural language-to-SQL system using RAG and LLMs, achieving **90%** query accuracy across 50 evaluation queries on multiple database schemas.
- Improved accuracy through schema-aware prompting, reducing SQL errors by **35%**.
- Enabled real-time querying on **50,000+ row** databases with instant chart visualization via Streamlit.

EXPERIENCE

Data Analytics Intern Jan 2024 – Apr 2024
Skillrisers Infotech Pvt. Ltd. – Ghaziabad

- Built automated data cleaning pipelines using Python ETL scripts on 100K+ row datasets, reducing manual processing time by 35%.

EDUCATION

IMS Engineering College, Ghaziabad 2022 – 2026
B.Tech in Computer Science and Engineering CGPA: 7.6/10

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional.** [\[Link\]](#)
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate.** [\[Link\]](#)

ACHIEVEMENTS

- **Runner-Up, National Hackathon (Graphic Era 2024):** Top 3 among 500+ teams; developed HappyPup, a real-time mood detection and therapy assistant.
- **1st Runner-Up, CODEARAMBH Hackathon (Apr 2025):** Led team to design and deliver a working software solution under 24-hour constraints, placing 2nd in a competitive national-level event.
