SUMMARY

Computer Science graduate with a strong foundation in Data Structures & Algorithms, backend system design, and full-stack development. Experienced building and testing reliable, production-oriented applications — REST APIs to containerized, CI/CD-driven deployments.

TECHNICAL SKILLS

- **Programming Languages:** Python, C++, SQL
- **DSA:** Arrays, Graphs, Trees, DP, Backtracking, Hashing
- **Backend, DB & DevOps:** FastAPI, REST APIs, MySQL, SQLite, FAISS, Docker, GitHub Actions, AWS
- **Core CS:** Operating Systems, DBMS, OOP, System Design

PROJECTS

AgentForge | Python, CI/CD, Automated Testing Apr 2026 | *PyPI* · *GitHub*

- Developed and published an open-source Python package to PyPI, implementing a modular, service-oriented architecture with 3 independent, fault-isolated service integrations.
- Implemented a circuit-breaker pattern (closed/open/half-open states) with exponential-backoff retry logic to handle transient failures gracefully.
- Built a full CI/CD pipeline using GitHub Actions, validating **79 automated unit tests** on every commit to ensure reliability before release.

Multi-Agent Research Assistant | Python, FastAPI, Docker Feb 2026 | *Live*

- Designed a multi-step processing pipeline with conditional branching logic and confidence-based decision handling.
- Reduced end-to-end latency by **~4x** by re-architecting sequential API calls into concurrent execution via `asyncio.gather`.
- Cut external API costs by **~90%** by batching multiple evaluation requests into a single call, with no loss in output quality.

Chat SQL | Python, MySQL, Query Validation Jan 2026 | *GitHub*

- Built a system translating natural language into SQL queries, achieving **90%** accuracy across 50 evaluation queries on multiple schemas.
- Implemented query validation and safety checks, including dangerous-pattern detection and pre-execution impact estimation with a confirmation flow before executing writes.
- Enabled real-time querying on **50,000+ row** databases with instant visualization via Streamlit.

EXPERIENCE

Data Analytics Intern Jan 2024 – Apr 2024

Skillrisers Infotech Pvt. Ltd. – Ghaziabad

- Built automated data cleaning pipelines using Python ETL scripts on 100K+ row datasets, reducing manual processing time by 35%.

EDUCATION

IMS Engineering College, Ghaziabad
B.Tech in Computer Science and Engineering

2022 – 2026
CGPA: 7.6/10

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional.** [Link]
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate.** [Link]

ACHIEVEMENTS

- **Runner-Up, National Hackathon (Graphic Era 2024):** Top 3 among 500+ teams; built HappyPup, a real-time mood detection assistant.
- **1st Runner-Up, CODEARAMBH Hackathon (Apr 2025):** Led team to design and deliver a working solution under 24-hour constraints.
